DETAILED ACTION

Allowable Subject Matter

1. Claims 1-38 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest a mass analyzer including: an ion storage device; a means for applying an ion extraction voltage pulse to said storage device to accelerate the ions whereby ions leaving the storage means have mass-to-charge ratio dependent velocities; a field free region; and detectors in combination with the remaining elements of claims 1 and 20. The prior art also failed to teach or fairly suggest the method of mass analyzing an ion stream which comprises the steps of: trapping ions in an ion storage device; and applying a longitudinal extraction voltage to the storage device whereby ions having a smaller mass-to-charge ratios travel at a greater velocity than ions of a larger mass-to-charge ratio in combination with the remaining elements of claim 14. In reference to claims 15 and 35, the prior art failed to teach or fairly suggest the method of analyzing a stream of ions of different mass-to-charge ratios which comprises the steps of: receiving and storing a predetermined number of said ions; accelerating said stored ions whereby ions of different mass-to-charge ratios attain different velocities; and

determining the mass-to-charge ratios of said ions by the distance traveled by ions of different mass-to-charge ratio in a predetermined time. The prior art also failed to teach or fairly suggest the method of mass analyzing a stream of ions of different mass-to-charge ratios comprising the steps of: directing said ion stream to an ion storage means and periodically applying an extraction voltage to said storage means to extract ions from said storage means with a velocity that is dependent upon the mass-to-charge ratio of said ions in combination with the remaining elements of claim 16. The remaining dependant claims meet the said criteria because of their dependencies upon the above-discussed independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
